Item	Relationship (single) (optional)	*TODO*

Field	Type	Description
Shrink Percent	Number (decimal) (optional)	Shrink acts as a padding to the reported cost of the finished good without affecting the inventory or general ledger. Shrink is meant to fiscally account for loss of ingredients during the manufacturing process by encouraging slightly higher markups.
Rule Base	Text (choice)	Use this field to determine whether to mark up from cost or mark down from MSRP.
Base Currency	Text (choice) (optional)	*TODO*
Rule Value	Number (decimal) (optional)	Use this field to enter an arbitrary value for Cost or MSRP to calculate a price. If used as a cost, this field will intelligently try to suggest existing costs but the value here does not tamper with the costing system -- for all intents and purposes this value is used for planning pricing.
Modifier	Text (choice)	This field determines whether the Value field will behave as a percentage of the base or if it will be straight additional margin.
Value	Number (decimal)	*TODO*
Price Currency	Text (choice) (optional)	*TODO*
Calculated Price	Number (decimal) (optional)	*TODO*
Info	Long text (optional)	Automatic pricing systems in Brisk will annotate their calculations here
