

Transportation Routes

Transportation Routes

Purpose and when to use this record

Define a repeatable origin, destination, checkpoint, distance, and operating pattern for transports.

At a glance

- **Identify it by: Name.**
- **Why care:** Use the agency's approved terminology and access policy. Preserve dates, responsible personnel, case links, and audit history because these records may support official reporting or custody review.

Before you begin

You need the Brisk permission for the action you are taking on transportation routes. If a Create, Edit, or Delete control is absent, do not work around it with another user's account; ask an administrator to review your role.

Create a Transportation Route

The screenshot shows a web application interface for creating a new transportation route. At the top, there is a navigation bar with a hamburger menu, the date 'Mon, Aug 10, 2026', a search bar with 'Search Here' and 'Search For...' dropdowns, and a user profile icon. Below the navigation bar is a breadcrumb trail: 'My site > Law Enforcement > Transportation Route List > New Transportation Route'. The main content area is a form titled 'Transportation Route Entry - New Transportation Route'. The form has a 'Name' label and a text input field. Above the form, there are buttons for 'Save', 'Cancel', '< Previous', and 'Next >'. The 'Save' button has a dropdown arrow.

The Transportation Routes create screen in the Brisk documentation demo.

Create a Transportation Route only after confirming that the source document or operational event has not already been entered.

1. Select the business context first.
2. Enter the required identifying and operational values: **Name**.
3. Review the identifying information shown on the screen against the source document or approved setup decision.
4. Save the Transportation Route, then confirm **Name** on its detail page before continuing.

After saving: Verify the identifying information shown on the screen on the detail page, then continue the law enforcement workflow only when those values agree with the source document and actual work performed.

Delete a Transportation Route

Delete this Transportation Route only when it was entered by mistake and no downstream history depends on it. Use a reversal, void, credit, counter-adjustment, or status correction for a real event that later changed.

Before confirming, check for related **Transportation Entries**, and **Transportation Route Audits**. Brisk may refuse deletion when another record depends on this one; resolve the duplicate or use the supported correction workflow instead of breaking the trail.

On the confirmation page, verify **Name**. After confirmation, return to the Transportation Routes list and make sure only the intended Transportation Route was removed.

Review Transportation Route details

Use the detail page as the shared record of what this Transportation Route currently means. Verify **Name** before relying on it for a decision.

Compare the Transportation Route with its source document or approved setup request before deciding that it needs correction.

Next check: Verify the identifying information shown on the screen on the detail page, then continue the law enforcement workflow only when those values agree with the source document and actual work performed.

Edit an existing Transportation Route

Edit this Transportation Route to correct or complete the same source document or operational event; use the supported reversal or follow-up workflow when the business event itself changed.

1. Open the detail page. Compare **Name** with the supporting document or approved request.
2. Recheck the identifying information shown on the screen. These values are most likely to change case history, custody, dispatch, official reporting, or audit review.
3. Save the change, return to the list, and confirm that the Transportation Route now appears under the expected **Name**.

After the change: Verify the identifying information shown on the screen on the detail page, then continue the law enforcement workflow only when those values agree with the source document and actual work performed.

Find and review transportation routes

The Transportation Routes list screen in the Brisk documentation demo.

Use the Transportation Routes list to find the correct record before opening or changing it. Compare **Name**. Compare the full identifier rather than relying on a similar name.

Open the Transportation Route whose **Name** match the task. If it is missing, clear the list filters and recheck the identifying information shown on the screen rather than creating a replacement immediately.

Fields and business rules

Brisk stores 1 user-relevant fields for this Transportation Route, including 0 linked-record selections and 0 controlled-choice fields. Create and edit screens may hide calculated or workflow-managed values from this full reference.

Field	Required	What it controls
Name	Yes	Should include the beginning and ending location of a transportation record.

What happens next

Verify the identifying information shown on the screen on the detail page, then continue the law enforcement workflow only when those values agree with the source document and actual work performed.

Common mistakes and troubleshooting

- **The record will not save:** Recheck **Name** and any message beside the field. A required related record may also be inactive or unavailable to your role.
- **The values look right but the result is wrong:** Compare this Transportation Route with the source document or approved setup decision, then check the downstream screen where it is used.
